

The power of diversification

Financial year total returns (%) for the major asset classes for financial years ending between 1987 and 2017.

The diagram below shows the performance of various asset classes over the past 30 years ranked from worst to best. When deciding where to invest their money, it is important investors understand that the best and worst performing asset classes will often vary from one year to the next. Having a diversified mix of investments across multiple asset classes can help smooth out returns over time.

The diagram also reinforces the importance of sticking to an investment strategy and focusing on the long term.
